## PERSONAL PROJECTS

### Gym Oversight System:

- This project is based on Java Language, which will be used to automate a gym center and therefore facilitating its operations.

### M.C.A. Department System:

- This project is based on PHP, HTML, JavaScript, Bootstrap. In this project admin manages the notice, syllabus and time table for students.

### Fresh Fruits Delivery Website

- Created a fresh fruits delivery app template using ReactJS and CSS, focusing on a clean, responsive design without Bootstrap. The template includes product listings and a user-friendly interface, serving as a foundational layout for developing a full-fledged e-commerce application.
